
Priority Resource Concerns (CPS 422): Terrestrial/Aquatic Habitat, Beneficial Invertebrates (IPM), Air Quality (PM/Drift/Odor), Visual/Physical Screens, Carbon Storage
Primary Practice: Hedgerow Planting (Code 422)
Is primary purpose to treat erosion, nutrient transport, sediment transport, or snow/soil trapping?
Yes
No - Meets CPS 422 Purpose
DO NOT USE CODE 422 Use Windbreak (380), Riparian Forest Buffer (391), Filter Strip (393), Veg. Barrier (601), 589C, or 311
Is site an open grassland with area-sensitive nesting birds?
Yes
No - Suitable Landscape
AVOID HEDGEROW PLANTING Linear woody cover fragments grassland & increases nest predation; use Code 420
Select Conservation Purpose & CAPP Narrative Code
Unresolved Spreadsheet Resource Concerns? (Site Prep, Irrigation/Mulch, Pollinator Diversity, Livestock, Erosion)
Establishment & Site Prep (CPS 422): Tree/Shrub Site Prep (490), Mulching (484), Microirrigation (441), Fence (382), Access Control (472)
Habitat & Pest Augmentation (CPS 422): Wildlife Habitat Planting (420), Wildlife Structures (649), Pest Mgmt Conservation System (595)
Erosion / Nutrient / Snow Trapping (Use Instead): Windbreak/Shelterbelt (380), Riparian Forest Buffer (391), Filter Strip (393), Vegetative Barrier (601), Alley Cropping (311)
Narrative: 00N Wildlife Hedgerow: Woody linear cover (≥ 1 woody row; no bunch grass alone)
Narrative: 01N Beetle Bank: Raised linear mound with grasses/woody plants for beneficial insects
Narrative: 02N Hedgerow Screen: Woody plants &/or tall grasses (≥ 3 ft) to block drift/PM/odor
Site Terrain & Planting Method?
Rugged / Difficult Access (Hand Planting Required)
Flat / Easy Access (Machine Planting Possible)
Scenario 30: Wildlife Hedgerow, High Labor (\$3.32/ft)
Scenario 31: Wildlife Hedgerow, Low Labor (\$2.35/ft)
Protect from pesticide drift (Follow Agronomy Tech Note 9)
Scenario 32: Beetle Bank (\$1.92/ft)
Screening / Air Quality Application Type?
Poultry House Exhaust Fans (Odor & PM Mitigation)
Field Drift, Odor, Dust, or Visual/Noise Screen (50-65% density)
Scenario 29: Grasses for Poultry House Air Quality Mitigation (\$3.23/ft)
Select chemical-tolerant species; exclude pollinator-attractive plants if intercepting toxic drift

Feedback to Design
Operation & Maintenance (O&M): Protect from unwanted fire & grazing; rejuvenate ≤ 1/3 length/width outside nesting season
