
Priority Resource Concern (CPS 645): Terrestrial Habitat for Wildlife & Invertebrates (Food, Cover, Connectivity, Conflict Reduction)
Primary Practice: Wildlife Habitat Management (Code 645)
Complete State-Approved Wildlife Habitat Evaluation (WHEG) to identify limiting habitat factors
Unresolved Spreadsheet Resource Concerns? (Perennial Cover, Fence Retrofits, Invasive Weeds, Erosion, Water)
Companion Habitat & Structural Practices: Wildlife Habitat Planting (420), Structures for Wildlife (649), Fence (382), Early Successional Habitat (647), Wetland Mgmt (644)
Disturbance & Pest Management: Prescribed Burning (338), Prescribed Grazing (528), Brush Mgmt (314), Herbaceous Weed Treatment (315), IPM (595)
Erosion, Buffer & Watering Practices: Conservation Cover (327), Field Border (386), Filter Strip (393), Critical Area Planting (342), Watering Facility (614)
Does a MORE SPECIFIC NRCS practice exist for the primary action needed?
Yes
No - 645 is Best Fit
DO NOT USE CODE 645 Use specific standard instead: Perennial Planting (420), Early Successional (647), Wetland (644), Aquatic (395), Structures (649), Burn (338), or Grazing (528)
Select Planning Objective & CAPP Narrative Code
Narrative: 00N Standard Mgmt: Enable movement &/or provide food/cover to meet min. WHEG criteria
Narrative: 01N High Enhancement: Exceed & improve upon WHEG criteria (even if baseline already passes)
Select Target Habitat Management Action
Plant Annual Seasonal Food or Cover
Set Back Succession / Increase Structural Diversity
Modify Crop Harvest Timing for Nesting Birds
Wildlife Movement Passage or Carnivore Deterrence
Land Use & Cropping Season Impact?
Disturbance Method & Bare Ground Need?
Passage Modification vs. Predator Deterrence?
Non-Cropland (Mow, Disk, Cultipack + NPK)
Cropland - In Lieu of Cash Crop (Includes Foregone Income)
Cropland - Outside Crop Season (No Foregone Income)
Mowing Woody Encroachment / Create Height Heterogeneity
Disking Dense Sod / Create Bare Ground for Forbs
Big Game Migration Passage (Cameras + Adjustable/Lay-Down Fence)
At-Risk Carnivore Deterrence (Turbo Fladry - Year 1 Install)
At-Risk Carnivore Deterrence (Turbo Fladry - Years 2–5 Reinstall)
Scenario 327: Establishment of Seasonal Forage or Cover on Non-Cropland (≈$449.35/ac)
Scenario 392: Seasonal Forage/Cover on Cropland, Foregone Income (≈$694.58/ac)
Scenario 393: Seasonal Forage/Cover on Cropland, w/o Foregone Income (≈$223.62/ac)
Scenario 586: Mowing (≈$327.33/ac)
Scenario 607: Disking (≈$204.93/ac)
Scenario 628: Delayed Harvest, Silage-Corn Rotation (≈$815.04/ac)
Scenario 397: Monitoring & Mgmt of Adjustable-Wire, Lay-Down Fence & Gates (≈$0.12/ft)
Scenario 398: Turbo Fladry Carnivore Deterrent Fence, Year One (≈$1.95/ft)
Scenario 399: Turbo Fladry Carnivore Deterrent Fence, Yrs 2–5 (≈$0.55/ft)
Feedback to Design
Monitoring & Adaptive Management (CPS 645): Re-evaluate WHEG post-treatment; time disturbances outside nesting/brood-rearing; verify agency coordination
